

# ODOO

**29/10/2024**

**Creado por: Pedro José Riquelme Guerrero**

# Entorno Windows

Descargar Odoo para Windows:

Visita la página oficial de Odoo y selecciona la versión deseada.

Descarga el instalador para Windows.

Instalación de Dependencias:

The screenshot shows a Windows 10 virtual machine environment. A web browser is open to the URL `nightly.odoo.com/18.0/nightly/windows/`. The page title is "Index of /18.0/nightly/windows/". It displays a list of files and their corresponding dates and sizes.

## Ejecutar el Instalador de Odoo:

La instalacion de odoo es bastante simple en windows solamante es darle a next, y en la pantalla donde nos pregunta por hostname, port, username, password le ingresamos nuestros datos

The screenshot shows a Windows 10 virtual machine environment. In the background, a web browser displays the 'Index of /18.0/nightly/windows/' page, which lists various Odoo setup files with their dates, times, and sizes. Overlaid on this is the 'Odoo 18.0.20241029 Setup' window. The installer window features the Odoo logo and the URL 'https://www.odoo.com'. It prompts the user to 'Check the components you want to install and uncheck the components you don't want to install. Click Next to continue.' Below this, there is a section 'Select the type of install:' with a dropdown menu set to 'Odoo Server And PostgreSQL Server'. Underneath, there is a list of optional components: 'Odoo Server' (checked), 'PostgreSQL Database' (checked), 'Odoo IoT' (unchecked), 'Nginx WebServer' (unchecked), and 'Ghostscript interpreter' (unchecked). A 'Description' section below the list says 'Position your mouse over a component to see its description.' At the bottom of the window, it states 'Space required: 1.2 GB' and has three buttons: '< Back', 'Next >' (highlighted), and 'Cancel'.

Windows taskbar: 15:33 29/10/2024

To direct input to this VM, move the mouse pointer inside or press Ctrl+G.

Una vez instalado nos mandará a la pagina de odoo donde tendremos que rellenar otros datos y le daremos a create database

The screenshot shows a Windows 10 virtual machine running in VMware Workstation. A web browser is open to the URL `localhost:8069/web/database/selector`. The page displays the Odoo logo and a warning message: "Warning, your Odoo database manager is not protected. To secure it, we have generated the following master password for it: **bvm4-v4m8-92nz**". Below the warning, there are input fields for "Master Password", "Database Name" (filled with "Pedro-Odoo"), "Email" (filled with "pedrojoseriquelme34@gmail.com"), "Password", "Phone Number" (filled with "693760532"), "Language" (set to "Spanish / Español"), and "Country" (set to "Spain"). A "Demo Data" checkbox is checked. At the bottom, there is a blue "Create database" button and a link "or restore a database". The VMware interface at the bottom shows the taskbar with various icons and a system clock indicating 15:49 on 29/10/2024.

## Entorno Linux (Ubuntu)

Puedes descargar el .deb **AQUÍ**

Una vez tenemos el .deb nos encargaremos de seguir paso a paso los pasos que nos indica la pagina web para poder instalarlo todo correctamente.

1. **sudo apt install postgresql -y**
2. **wget -q -O - https://nightly.odoo.com/odoo.key | sudo gpg --dearmor -o /usr/share/keyrings/odoo-archive-keyring.gpg**
3. **\$ echo 'deb [signed-by=/usr/share/keyrings/odoo-archive-keyring.gpg] https://nightly.odoo.com/18.0/nightly/deb/ .' | sudo tee /etc/apt/sources.list.d/odoo.list**
4. **\$ sudo apt-get update && sudo apt-get install odoo**
5. **sudo apt update**
6. **sudo apt upgrade**
7. **sudo apt install python3-pip**
8. **sudo pip3 install xlwt**
9. **sudo dpkg -i <odoo\_18.0.latest\_all.deb**
10. **sudo apt-get install -f**
11. **sudo dpkg -i <odoo\_18.0.latest\_all.deb>**

Una vez hechos todos los pasos para instalarlo nos llevará al mismo sitio que en Windows

The screenshot shows a VMware Workstation window titled "Ubuntu - VMware Workstation". Inside, there's an Ubuntu 22.04 desktop environment. A Firefox Web Browser is open, displaying the Odoo database selector page at the URL `localhost:8069/web/database/selector`. The browser tabs include "Paquete de instalador", "Thank you for downlo...", and "Odoo". The page features the Odoo logo at the top. A yellow warning box states: "Warning, your Odoo database manager is not protected. To secure it, we have generated the following master password for it: **ai5c-ewnd-df3j**. You can change it below but be sure to remember it, it will be asked for future operations on databases." Below the warning, there are input fields for "Master Password", "Database Name" (filled with "Pedro2-Odoo"), "Email" (filled with "pedrojoseriquelme34@gmail.com"), "Password", "Phone Number" (filled with "+34 693760532"), "Language" (set to "Spanish / Español"), and "Country" (set to "Spain"). A "Demo Data" checkbox is checked. At the bottom, there is a blue "Create database" button and a link "or restore a database". The VMware status bar at the bottom indicates "To direct input to this VM, move the mouse pointer inside or press Ctrl+G."
